Save up to 85% on Rx drugs at your pharmacy.

powered by Discount Drug Network

HOW TO USE THE CARD:

Have Insurance?
If you are obtaining a generic prescription and your co-pay is more than $10, then present this card to your pharmacist and ask, “What is my Discount Drug Card price?” frequently it is less than your co-pay. This card can also provide discounts on medications not covered by your prescription plan.

No Insurance? No problem! Use this card at the pharmacy every time you fill a brand name or generic prescription and save.

Not only can you save money, but each time this savings card is used the retailer donates a small portion of the transaction to ProLiteracy.
